WHAT IS CLAIMED:

- 1. A fibrous web (1) comprising a first region (2) and at least one discrete integral second region (4), the second region (4) having at least one portion being a discontinuity (16) exhibiting a linear orientation and defining a longitudinal axis (L) and at least another portion being a deformation (6) comprising a plurality of tufted fibers (8, 18) integral with but extending from the first region (2).
- 2. The fibrous web of Claim 1, wherein said web comprises a plurality of discrete integral second regions.
- 3. The fibrous web of Claim 2, wherein said plurality of discrete integral second regions is uniformly distributed on said fibrous web.
- 4. The fibrous web of Claim 1, wherein said fibrous web comprises a nonwoven web of substantially randomly oriented fibers.
- 5. The fibrous web of Claim 2, wherein said fibers comprise materials selected from the group consisting of cellulose, rayon, cotton, polyethylene, polypropylene, polyester, and blends thereof.
- 6. The fibrous web of Claim 2, wherein said fibers comprise bicomponent fibers.
- 7. The fibrous web of Claim 2, wherein said fibers comprise non-round fibers.
- 8. The fibrous web of Claim 1, wherein said web comprises at least 10 discrete integral second regions per square centimeter.
- 9. The fibrous web of Claim 1, wherein a portion of said tufted fibers define an open void area internal to said second regions.
- 10. A wipe comprising said fibrous web of Claim 1.

- 11. A soft, tufted fibrous web (1) comprising substantially randomly-oriented fibers, the web (1) comprising a first region (2) and a plurality of discrete second regions (4), each of the second regions (4) having at least one portion being a discontinuity (16) exhibiting a linear orientation and defining a longitudinal axis (L) and at least another portion being a deformation (6), wherein the deformation (6) comprises fibers (8, 18) integral with but extending from first region (2) and fibers (11) neither integral with nor extending from first region (2).
- 12. The fibrous web of Claim 11, wherein said fibers comprise materials selected from the group consisting of cellulose, rayon, cotton, polyethylene, polypropylene, polyester, and blends thereof.
- 13. The fibrous web of Claim 12, wherein said fibers comprise bicomponent fibers.
- 14. The fibrous web of Claim 12, wherein said fibers comprise non-round fibers.
- 15. The fibrous web of Claim 11, wherein said web comprises at least 10 discrete integral second regions per square centimeter.
- 16. A wipe comprising said fibrous web of Claim 1.
- 17. A disposable absorbent article, said article having at least one component comprising a fibrous web (1) comprising a first region (2) and a plurality of discrete integral second regions (4), the second regions (4) having at least one portion being a discontinuity (16) exhibiting a linear orientation and defining a longitudinal axis (L) and at least another portion being a deformation (6) comprising a plurality of tufted fibers (8, 18) integral with but extending from the first region (2).
- 18. The article of Claim 17, wherein said article is selected from the group consisting of a catamenial article, a tampon, or a diaper.
- 19. The article of Claim 17 wherein said fibrous web comprises a topsheet of said article.

- 20. The article of Claim 17 wherein said fibrous web comprises an absorbent core of said article.
- A multilayer fibrous web (1) comprising at least an upper layer and a lower layer, the multilayer fibrous web further comprising a first region (2) and a plurality of discrete integral second regions (4), the second regions (4) having at least one portion being a discontinuity (16) exhibiting a linear orientation and defining a longitudinal axis (L) and at least another portion being a deformation (6) comprising a plurality of tufted fibers (8, 18) integral with but extending from the first region (2) wherein the deformation (6) comprises at least the upper layer.
- 22. The fibrous web of Claim 21, wherein said upper and lower layers each comprise a nonwoven web of substantially randomly oriented fibers.
- 23. The fibrous web of Claim 21, wherein said fibers comprise materials selected from the group consisting of cellulose, rayon, cotton, polyethylene, polypropylene, polyester, and blends thereof.
- An absorbent core comprising a fibrous web of randomly oriented fibers with respect to an X-Y plane, said core comprising a first surface and a second surface, a plurality of discrete regions of fiber reorientation at least on said first surface, each said discrete region having a linear orientation defining a longitudinal axis in said X-Y plane, and comprising a plurality of fibers having portions reoriented in a direction substantially orthogonal to said X-Y plane.
- 25. The absorbent core of Claim 24 wherein said plurality of discrete regions are only on said first surface.
- 26. The absorbent core of Claim 24 wherein said discrete regions comprise fibers extending from said first surface to said second surface.
- 27. An absorbent article comprising a topsheet, a backsheet, and an absorbent core disposed between the topsheet and the backsheet, the absorbent core comprising a fibrous web of randomly oriented fibers with respect to an X-Y plane, said core comprising a first surface and a second surface, a plurality of discrete regions of fiber reorientation at least

on said first surface, each said discrete region having a linear orientation defining a longitudinal axis in said X-Y plane, and comprising a plurality of fibers having portions reoriented in a direction substantially orthogonal to said X-Y plane.
